

To all our customers

DECOF BVBA STATEMENT ON 'REACH'

As manufacturer of brushes, our products are not directly affected for registration, as defined in the regulation No. EC 1907/2006 (REACH), but different customer request show us that this topic requires considerable clarification.

The pre- registration of the employed raw materials to produce our brushes will be effected by the Manufacturer and- respectively their sub- suppliers. As we produce tools and brushes exclusively composed of raw materials from well-known manufacturers, it is assumed that the process of registration will be unproblematic.

We are in close contact with our producers of our raw-materials and for this reason we will inform you directly on the actual state of affairs.

Best regards,

BVBA DECOF
